WATERPROOF, BREATHABLE FINE WALL FINISH

IZONIL Skim Coat

IZONIL Skim Coat is a waterproof, breathable, super-white skim coat for exterior and interior plastered or concrete walls, including rain-exposed and water-prone wall areas.

PRODUCT PROPERTIES

Wall-finish role	Waterproof.
Vapour behaviour	Breathable.
Finish	Fine and super white.

Manufacturer packaging reference.

Fine white skim coat on a concrete wall.

A fine white finish on a vertical mineral wall.

Uses and benefits

Fine white wall finish

Provides a fine, super-white surface on suitable vertical plastered, precast-concrete and cast-in-place-concrete walls, indoors and outdoors.

Waterproof and breathable

Resists liquid rain while allowing moisture vapour to leave the wall. Compatible vapour-open decoration preserves this breathable-wall role.

Material and application

Applications	For suitable vertical plastered walls and precast or cast-in-place concrete, including exterior and interior wall finishing.

Application notes

This overview covers vertical wall finishing. Tanks, floors, roof decks, moving cracks and pressure-loaded assemblies require a separately specified complete system.

Preparation, coat build-up and weather protection depend on the supplied Skim Coat variant, regional application method and project conditions.

Product overview. The applicable technical and safety data sheets govern application and handling.

The June 2018 White Superfine sheet is a historical reference; its match to the supplied Skim Coat variant and regional method remains unverified.
